

include/enemies/koopaShell.hh

```
graph TD; A[include/enemies/koopaShell.hh] --> B[core/geometry.hh]; A --> C[vector];
```

The diagram illustrates the include dependencies for the file `include/enemies/koopaShell.hh`. It is represented as a root node at the top, which has two arrows pointing downwards to its dependencies: `core/geometry.hh` on the left and `vector` on the right. The root node is shaded gray, while the dependency nodes are white with black borders.

core/geometry.hh
